Islāmābād, Pakistan

## Summary

I am an enthusiastic Software Engineer with a passion for staying at the forefront of technological advancements. My career journey has been driven by a relentless desire to contribute my skills to organizations while continuously enhancing my own capabilities.

As a Jr. Android Developer with Machine Learning experience, I kicked off my professional journey at Code Red Lab in January 2018. During my tenure, I had the opportunity to delve into the world of Android development while exploring the exciting field of Machine Learning. This role not only honed my technical skills but also introduced me to the intricacies of bridging these two domains.

My next career milestone led me to DNA Micro in January 2022, where I took on the role of an Jr. Software Engineer Ai. Here, I further honed my expertise in Android app development with integration of Artificial Intelligence, ensuring that I stayed updated with the latest tools and techniques in the field.

I pride myself on my versatile skill set, which includes proficiency in NLP (Natural Language Processing), Computer Vision, Pytorch, Python, Tensorflow, Kotlin, and Android Studio. These skills empower me to take on a wide range of challenges in the digital world.

Looking forward, I am eager to join an organization where I can not only continue to expand my technical knowledge but also utilize my practical and research-driven approach to solve real-world problems. I am committed to making a meaningful impact by leveraging the latest technologies and innovative solutions.

If you're seeking a dedicated and dynamic Software Engineer with a strong foundation in Android development and a passion for Machine Learning, I'm ready to contribute to the success of your organization.

Let's connect and explore how we can collaborate to drive innovation and efficiency together.

---

## Experience

### 9D Technologies

Machine Learning Engineer

September 2023 - Present (9 months)

Punjab, Pakistan

Creating Generative Ai Models using Deep Learning and Machine Learning techniques in the domain of Natural Language Processing and Computer Vision.

### DNA Micro

Junior Software Engineer Ai

January 2023 - June 2023 (6 months)

Irvine, California, United States

Developed a customized Optical Character Recognition model and NER feature for detecting and classifying receipts data.

### APPTRICK

Jr Android Developer Ai

January 2022 - December 2022 (1 year)

Rawalpindi, Punjab, Pakistan

Developed and Utilized advanced ML models and Integrated in Android.

### Code Red Lab

Android Developer with Ai

January 2018 - December 2018 (1 year)

Attock Punjab Pakistan

Developed basic Ai models in the domain of CV and integrated in them in Android application.

---

## Education

National University of Computer and Emerging Sciences

Masters, Artificial Intelligence · (September 2021 - February 2024)

COMSATS University Islamabad

Bachelor's degree, Software Engineering · (September 2016 - August 2020)
